

Summer 2015

Dear Clinic Manager

Kabuki UK supports families affected by Kabuki Syndrome. One of our aims is to raise awareness of Kabuki Syndrome by distributing information to local hospitals and gaining a higher internet and press presence.

Kabuki Syndrome has historically been under diagnosed due to a lack of knowledge of the syndrome. With recent developments in the genetic testing we are seeing more and more people being diagnosed at younger ages and our membership is growing.

We have a thriving online community and a great website but many people still don't know about us and we want to try to reach out to them. If you have been given this letter by one of our members they will also have given you a poster. It would be extremely helpful to us if you could find space to display it in your clinic or waiting area.

There may be families passing through your clinic, who have not heard of the charity, who will see the poster. We may be able to assist those people in some way, either via our Grant Scheme or by them coming to one of our Family Days.

Very best wishes

Sally Trewartha
